

A Smart Fire Alarm That Calls For Help

Regular smoke alarms only give an audible alert in a case of fire which only people within the premise can hear. Today we can do more.

Calling Your Neighbours, then Bomba.

The asap Smart Fire Alarm is wireless connected to asap's control system and able to contact multiple people in the proximity via Push Notification, SMS, Whatsapp and by phone call, as well as the nearest Bomba station.

Up to 3 levels of alert escalation: First alert the household owners, then neighbours and security guards, and after 120 seconds, Bomba also gets alerted.

Mobile App

The free mobile app enables the User to register, monitor and engage with the Smart Fire Alarm.

Additional App Functions:

- Register device & home address
- Manage emergency contact persons
- Disable the alarm
- Panic button
- Submit insurance claim

INCLUDED :

- **Smart Alarm Sensor**
- **Remote Alarm Monitoring**
